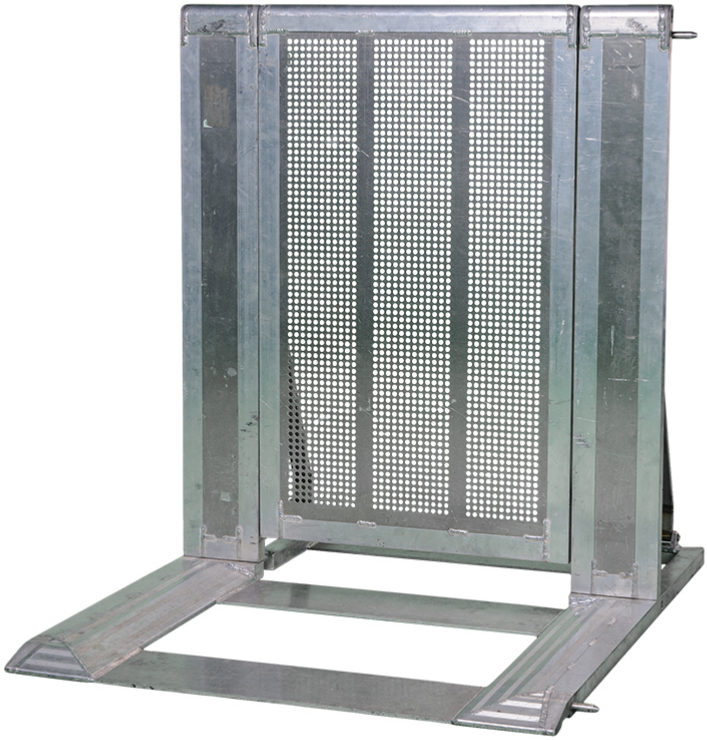
# MOJO CABLE ENTRY BARRIER, SILVER



The MOJO Cable Entry Barrier in silver ensures safe and efficient cable management with a pass-through for multicore cables, perfect for event setups.

**SKU:** 1002002 | **Categories:** Concert Barricades, Crowd Control

## PRODUCT DESCRIPTION

The MOJO Cable Entry Barrier provides the ideal solution for safe cable pass-through and management at concerts, festivals, and large-scale events. Designed to accommodate multicore cables or cable bridges up to 80 mm in height, this barrier ensures smooth, kink-free cable access between the stage and front of house (FOH).

A removable vertical plate, secured with a 4-point hinge and bolt system, enables quick setup and easy access to cables, while the lowered base keeps cables flat and protected. Available in aluminium and black/silver finishes, this barrier adapts to various event aesthetics. The black/silver finish is ideal for setups requiring discretion, such as TV recordings or tours, while the aluminium finish provides a polished, professional appearance suited to traditional venues.

Built to endure high crowd pressure, the MOJO Cable Entry Barrier is engineered for high-traffic areas like front-line barricades. It must be secured between two MOJO Straight Barriers, forming a continuous and stable barricade line. Its interlocking system ensures fast, secure connections with other MOJO barriers, making it an essential component of any crowd control system.

## TECHNICAL INFORMATIONS

| | |
|---|---|
| **Weight** | 44 lbs |
| **Dimensions** | 1 × 1.18 × 1.28 in |
| **Cable Height Capacity** | Up to 80 mm |
