

MOJO BARRIER 45° POSITIVE CORNER, BLACK [GREEN]

The MOJO 45° Positive Corner Barrier—known as the “Green” corner—creates sharp, defined angles in crowd control setups, ideal for concerts, festivals, and large-scale events.

SKU: 1002023 | **Categories:** [Concert Barricades](#), [Crowd Control](#)

PRODUCT DESCRIPTION

The MOJO Barrier 45° Positive Corner, also called the "Green" corner, is designed to create sharp, structured angles in barricade systems, making it the perfect solution for concerts, festivals, and large-scale events requiring precise crowd control. Its 45° angle directs crowd flow safely away from key areas, such as stages, backstage zones, and pathways.

Featuring a full floor plate and a single rear brace, this barrier offers exceptional stability even under heavy crowd pressure. The black aluminium frame integrates seamlessly into event setups, while the silver floor plate provides durability and a stable foundation for high-traffic areas.

Lightweight and easily transportable, the 45° Positive Corner is designed for rapid assembly, using a single-bolt interlocking system that ensures a continuous, secure barricade line. It is an ideal choice for creating sharp turns in barricade layouts, delivering both functionality and ease of use.

TECHNICAL INFORMATION

Weight	20.9 lbs
Colour	Black frame with silver floor plate
Angle	45° positive for creating sharp corners and secure lay
Material	Welded aluminium frame
Compatibility	Fully compatible with other MOJO barriers for seamless integration
