

INTERLOCKING STEEL CROWD CONTROL BARRIER WITH ROLLING BASE, 2,5M

Heavy-duty steel barriers with rolling bases for easy mobility, ideal for concerts, festivals, and dynamic event layouts.

SKU: 1002344 | **Categories:** [Crowd Control Barriers](#)

PRODUCT DESCRIPTION

Our interlocking steel crowd control barriers with rolling bases offer the perfect combination of stability and mobility, making them ideal for events where layouts frequently change. The rolling base ensures easy movement and repositioning, allowing for seamless setup and adjustments during concerts, festivals, and public gatherings.

Constructed from high-quality galvanised steel, these barriers are built to endure heavy use and harsh weather conditions, providing long-lasting performance. The interlocking system ensures secure connections between barriers, while the lightweight design simplifies transport and handling for event organisers.

These versatile barriers are essential for creating safe and adaptable event spaces, offering both reliability and portability.
