

CROWD CONTROL BARRIER GATE, DOUBLE ENTRY

Double-entry crowd control gate ensures smooth crowd flow and secure access at concerts, sports events, and festivals.

SKU: 1002354 | **Categories:** [Crowd Management Entry Solutions](#)

PRODUCT DESCRIPTION

The Crowd Control Barrier Gate, Double Entry, is an essential part of our Crowd Management Entry Solutions, designed to efficiently manage large crowds at concerts, sports events, and festivals. This gate system facilitates smooth and organised attendee entry and exit, ensuring safety and efficiency in high-traffic areas.

Constructed from durable barrier panels, the gate consists of three barrier panels, two base plates, and two doors, making it suitable for areas with low to medium crowd pressure. Its simple and robust design ensures effective crowd control, while the gate integrates seamlessly with additional barrier sections for expanded entry systems.

The Double Entry Gate is the ideal solution for event organisers seeking reliable and efficient systems to manage large volumes of foot traffic while prioritising safety.
