

MOJO GATEKEEPER TURNSTILE GATE

The MOJO Gatekeeper Turnstile Gate offers a secure, automated system for managing entry and exit at events, venues, and restricted areas.

SKU: N/A | **Categories:** [Crowd Management Entry Solutions](#)

PRODUCT DESCRIPTION

The MOJO Gatekeeper Turnstile Gate is an advanced crowd management solution designed to securely control entry and exit at events, venues, and restricted zones such as VIP areas or staff-only sections. This intelligent system offers real-time monitoring of crowd flow and can function as a standalone unit or seamlessly integrate with your event's ticketing system for automated access management.

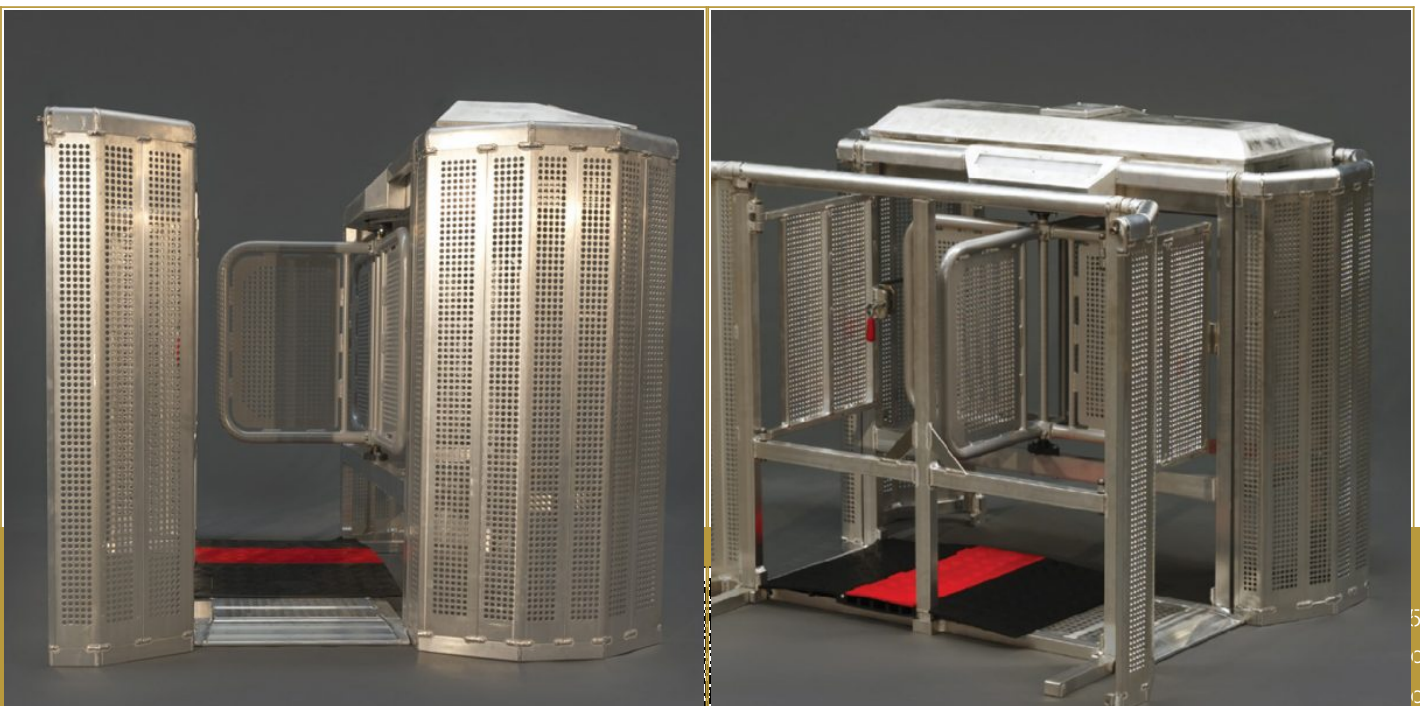

Connecting directly to a central computer system, the Gatekeeper Turnstile Gate provides accurate real-time capacity data and regulates attendee flow. Its quick installation and compatibility with all major ticket scanning technologies—including barcodes, RFID, and QR codes—make it a versatile and essential tool for event security and crowd control.

Perfect for large-scale events, the MOJO Gatekeeper Turnstile Gate helps organisers reduce ticket fraud, enhance attendee flow, and ensure event safety. By automating the entry process and delivering real-time insights, it ensures a seamless and secure experience for both attendees and staff.

Specifications:

- **System Compatibility:** Works with barcode, RFID, and QR code ticket scanning systems
- **Integration:** Connects to central computer systems for real-time monitoring
- **Applications:** Suitable for entry and exit at events, venues, VIP zones, and restricted areas
- **Setup:** Quick installation and fully compatible with MOJO crowd control systems
