

## LOW TEMPORARY FENCE PANEL, 3.5M X 1.1M

Low-height temporary fence panel (3.5m x 1.1m), perfect for creating secure boundaries while maintaining visibility at events.

**SKU:** 1001485 | **Categories:** [Temporary Fencing](#)

## PRODUCT DESCRIPTION

The Low Temporary Fence Panel provides an effective solution for event demarcation and crowd control, particularly in areas where maintaining visibility is crucial. With dimensions of 3.5m wide and 1.1m high, these panels are ideal for creating defined boundaries without the height of traditional fencing. Perfect for marking VIP zones, parking areas, walkways, or controlled spaces at festivals and corporate events.

Constructed from durable galvanised steel, these panels are designed to withstand outdoor conditions and ensure long-lasting performance. The low height allows for easy communication across the barrier while maintaining a clear and secure separation for crowd control or restricted access.

Lightweight and easy to install, the Low Temporary Fence Panel is an excellent choice for events requiring quick setup and efficient use of space.
